

SMD Scope Probe Connections:

The old three-books-a-coffee-cup-and-solder way.

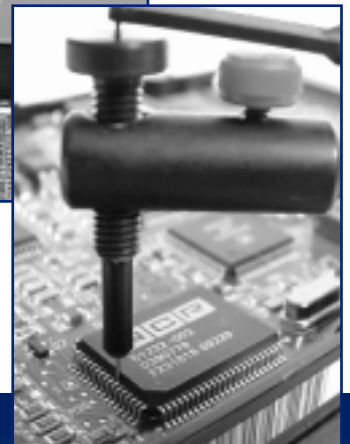

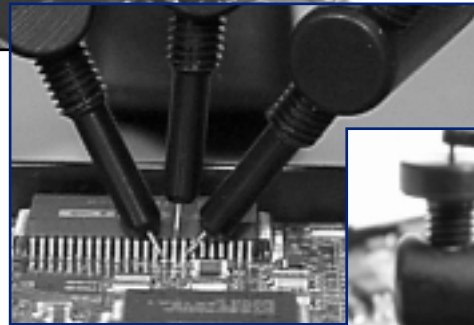

- Flexible shaft lets you position your scope probe precisely where you want it.
- Weighted non-skid base keeps your probe securely in position.
- No more temporary soldered leads that cause costly board damage.
- Probe adjacent contacts with ease and accuracy.

The QuickProbe Way.

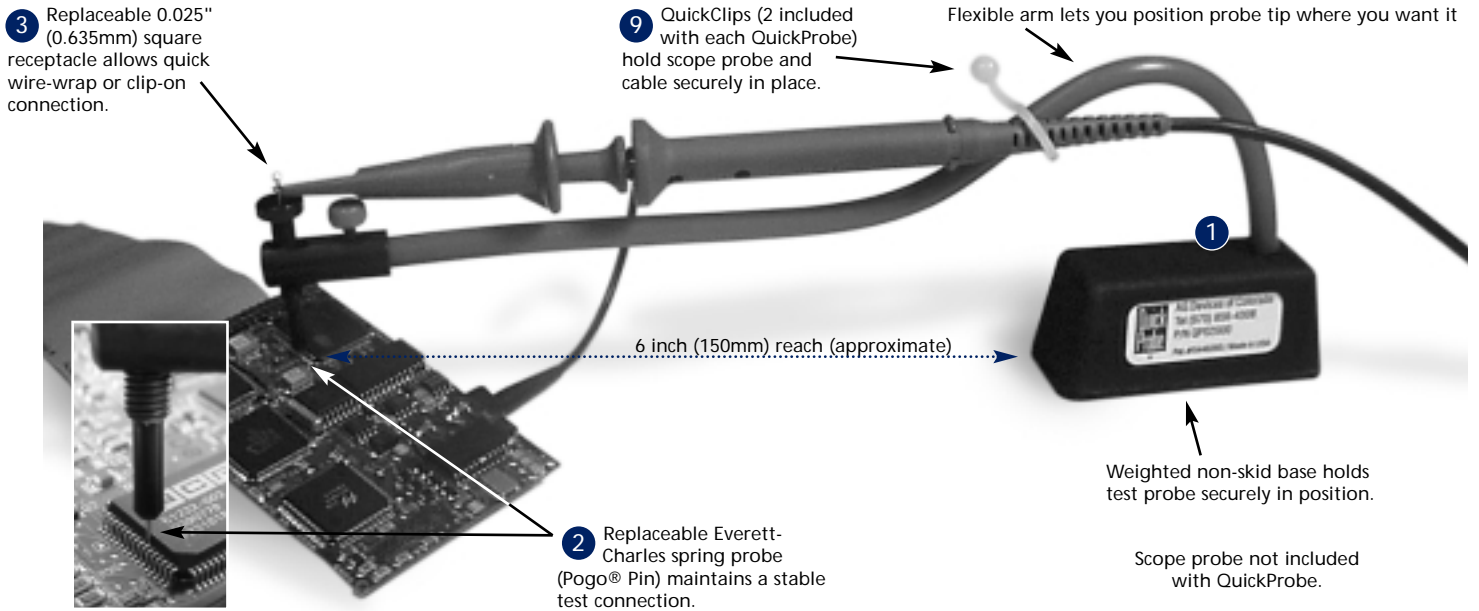

QuickProbe

is a versatile, inexpensive way to add accuracy and stability to your SMD test connections. QuickProbe gives you an easy way to position your test probe with precision and reliability. Once you position your probe, it stays there. No more improvised and unstable probing methods. No more costly damage to boards from temporary soldered leads. If you're trying to position a probe on microvias, QFPs, TSOPs, SOICs, MSOPs, or any other fine pitch, high density surface mount devices, QuickProbe is the third hand you wish you had.

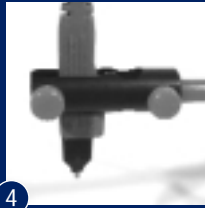

A better way to make SMD scope probe connections.

A better way to make SMD scope probe connections.

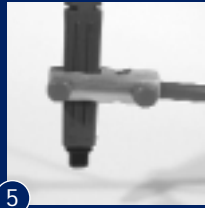

The standard probe head, included with every QuickProbe, can be easily replaced with optional adapters designed for specific scope probes:

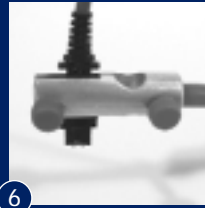

The heads shown here are compatible with the most popular probe styles. If one of these heads does not fit your probe, other styles are available, or can be created, to meet your needs.

Ordering Information

Item	Part #	Price
1 QuickProbe (includes standard probe mount & tip)	QP02000	\$ 70.00
Accessories		
2 Replacement tip for standard probe head	QP0209	\$ 4.00
3 Replacement receptacle for standard probe head	QP0210	\$ 4.00
4 Adapter for Tektronix P6245 scope probe	QPT6245	\$ 65.00
5 Adapter for Tektronix P6246 scope probe	QPT6246	\$ 65.00
6 Adapter for Tektronix P6240 scope probe	QPT6240	\$ 65.00
7 Adapter for Pomona 3ACAT3 scope probe	QP3ACAT3	\$ 65.00
8 Adapter for LeCroy LAP033 scope probe	QLAP033	\$ 65.00
9 QuickClip 3/8inch (9.5mm)	QPWC38	\$ 0.50
9 QuickClip 1/2inch (12.5mm)	QPWC50	\$ 0.50
